**NSOC**

**Security Vulnerability Management**

---

**Introduction**

Vulnerability Management consists of Risk Discovery, assessing the exposure to security threats and provides recommendations on possible solutions to eliminate these threats.

**Solution Definition**

Vulnerability Management is an on demand solution, fully automated to identify vulnerabilities, track remediation and reduce network security threats. Driven by the most comprehensive vulnerability Knowledgebase in the industry, delivering continuous protection against the latest worms and security threats without the substantial cost, resource and deployment issues associated with traditional software.

**Solution Value Proposition**

By continuously and proactively monitoring all network access points, Vulnerability Management dramatically reduces security managers’ time researching, scanning and fixing network exposures and enables companies to eliminate network vulnerabilities before they can be exploited.

**Key Packaged Offerings**

- Vulnerability Discovery
- Vulnerability Assessments
- Vulnerability Analysis and Recommendations
- Web Application Scanning

**Differentiators**

- Turnkey deploy ability
- Requires no software to install, update or maintain.
- Automates all steps of vulnerability assessment, management and threat reduction

- Trusted, unbiased third-party security auditing and compliance reporting meets industry and regulatory compliance requirements
- Accurate and always up-to-date vulnerability audits
- Easy-to-use, comprehensive reporting
- Cost efficient with no hidden costs
- Secure, with complete end-to-end data encryption

**Competitive Environment**

- Award winning Solution
- Multi skilled Security Experts

**Key Deliverables for each packaged Offering**

- Includes initial network mapping of the environment.
- Accurate and Thorough Security Scan.
- Technical and executive reports with a report back session where a security professional assists the customer to understand their threats and vulnerabilities.

**Complementary Solution Offerings**

- Security Professional Services around consulting
- Architecture and remediation guidance.
- Possible to Integrate into Information Security Monitoring

**Strategic Alliances**

- Vendor Partnership

**Assist Teams**

- Security Professional
- Pre-sales Consultant
